

Our Oceans

An Amazing
Fact a Day

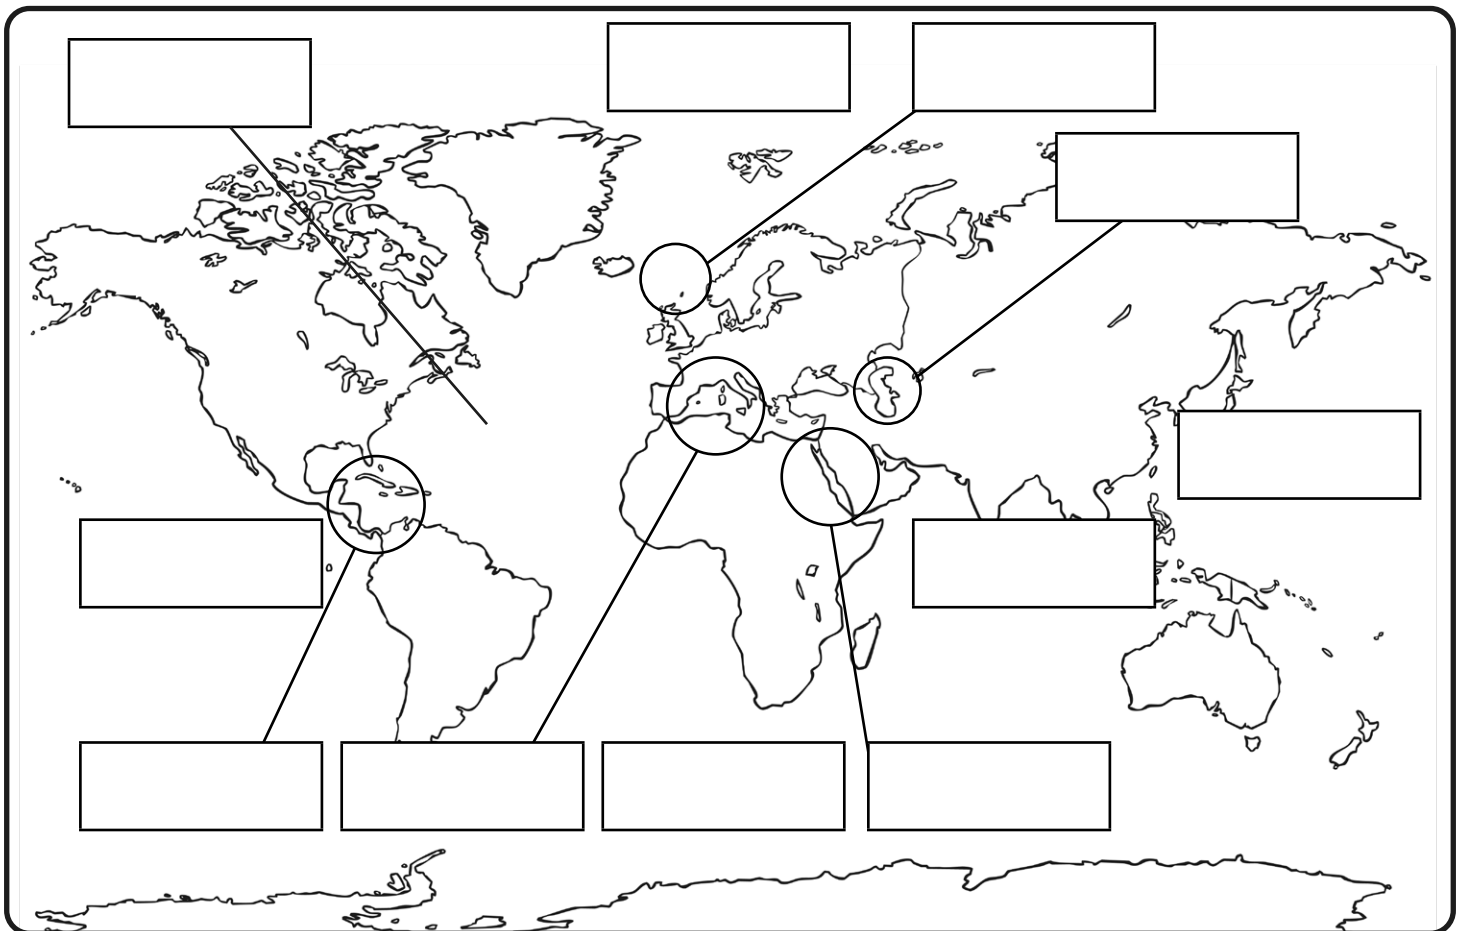

As the Earth spins around, there is a viewpoint from space where all you can see is Pacific Ocean.

1. Write the ocean names in the correct boxes on the map. Use these names to help you.

Atlantic Ocean	Pacific Ocean	Pacific Ocean	Indian Ocean	Arctic Ocean	Southern Ocean
----------------	---------------	---------------	--------------	--------------	----------------

2. Draw arrows from the continent names to the correct places on the map.

North America	South America	Africa	Australasia	Asia	Antarctica
---------------	---------------	--------	-------------	------	------------

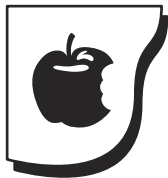

3. Write the name of the sea in the correct box. Use these names to help you.

North Sea	Red Sea	Caribbean Sea	Mediterranean Sea	Caspian Sea
-----------	---------	---------------	-------------------	-------------

You could also try to find out:

- the size of each ocean on Earth, and order them from smallest to largest;
- the names of some islands in the Pacific Ocean;
- if there are any artificial human features on Earth that can be seen from space;
- if any other photos of Earth have been taken from space.
