

Session 2 challenges

Add Two 2-Digit Numbers (2)

1. Write a number to complete each statement.

$$35 + 39 > \square$$

$$56 + 27 = \square$$

$$64 + 28 < \square$$

$$19 + 23 > \square$$

$$45 + 46 = \square$$

$$76 + 15 < \square$$

- 2.

Amir has been asked to complete the bar model.

The whole is 78
because $5 + 2 = 7$
and $1 + 7 = 8$

Explain to Amir what he has done wrong. How could you help him work out the correct total?
