

Session 2 challenges answers

- 1.
- $35 + 39 > \text{any number less than } 74$
- $56 + 27 = 83$
- $64 + 28 < \text{any number greater than } 92$
- $19 + 23 > \text{any number less than } 42$
- $45 + 46 = 91$
- $76 + 15 < \text{any number greater than } 91$

2.

Amir has found the digit totals and put the digits together to make 78

The correct answer is 69 and this could be shown by using Base 10 and a place value chart.
