

Length Challenges Answers

1.

The length will not change if you change the orientation so it will be easier to measure if you put it in a straight line.

2.

Mo is incorrect because he has not lined the car up with the 0 marker. If he had measured from 0 he would see that the car is 7 cm long.

3.

Circle elephant,
school and tree

4.

Amir can measure
the length of the
classroom by
putting a marker at
the end of the
metre stick and
then starting again
at that point,
moving his metre
stick as he
measures.
