

Maths Week 2 Wednesday	Mass		
Starter	Practise 10 times table in extraordinary home learning book, or you can use the Daily 10 website if you would like. Link is: https://www.topmarks.co.uk/maths-games/daily10 Today we are going to be learning about 'mass' and how to compare the weight of different objects. Please watch the video on our website.		
Parent	When watching the video, pause where you feel necessary to discuss anything your child is unsure of and to give time to answer the questions. Use the words more, less, heavier, heaviest, lighter, lightest, equal to compare weights.		
Activities These become slightly more challenging and you can choose which you do or if you want to try more than one. It is also a way to provide practical opportunities as well as written opportunities.	*	**	***
	Internet based	Practical and written based	Written based
	If you do not have scales at home this activity can be done without. Play the following game about ordering objects on their mass: https://central.espresso.co.uk/espresso/primary_uk/subject/module/activity/item852515/grade1/module849225/index.html	Using the scales in your house can you weigh a variety of objects and write how much they weigh in grams.	Looking at the objects you have weighed previously, can you order them from lightest to heaviest in your extraordinary home learning book.
Parent	There will be extra challenges for each mathematical concept to complete if your child is confident with what they have done and would like to be challenged further.		

Maths Week 2 Thursday	Mass		
Starter	Practise 10 times table in extraordinary home learning book, or you can use the Daily 10 website if you would like. Link is: https://www.topmarks.co.uk/maths-games/daily10 Today we are going to continue learning about mass, but use our knowledge of measuring in grams (g) that we learnt yesterday to now measure in kilograms (kg).		
Parent	When watching the video, pause where you feel necessary to discuss anything your child is unsure of and to give time to answer the questions. Use the words more, less, heavier, heaviest, lighter, lightest, equal to compare weights.		
Activities These become slightly more challenging and you can choose which you do or if you want to try more than one. It is also a way to provide practical opportunities as well as written opportunities.	*	**	***
	Internet based	Practical and written based	Written based
	If you do not have scales at home this activity can be done without. Complete the worksheet on the website.	Using the scales in your house can you weigh a variety of objects and write how much they weigh in kilograms. Think carefully about which objects would be ideal to weigh in kg.	Looking at the objects you have weighed previously, can you order them from lightest to heaviest in your extraordinary home learning book.
Parent	There will be extra challenges for each mathematical concept to complete if your child is confident with what they have done and would like to be challenged further.
